

Ben

During our drop day on the 24th of January, there were a lot of activities we could take part in: Drumming; Dancing; Flag Making; Making Face Masks and Video recording, I think that was it, but there may have been more. During drumming you would learn varieties of songs and playing them round the school with the dancers. The dancers would learn a dance and they would dance while the drummers were playing. During Flag making you got given a piece of paper with one of the heroes we choose and we had to draw something to do with them and put it onto cardboard, paint it and print it onto a piece of fabric we were using to make it. During the face mask lesson we were making a scary mask or a happy mask to wear in the carnival. Finally, during our video recording lesson, we were going around recording every activity that was taking place and putting them all together and then we finally showed them on the big screen.

I was involved in Drumming and Flag Making. During drumming we were learning loads of songs to play, and we had to learn special signals so we knew when to stop, carry on and so on, so it was a very hard task that we were set. During Flag Making we did loads of work, including writing about our heroes and then we picked a piece of paper out of a hat and we had to make a flag about them. I got David Haye, so I drew a picture of some boxing gloves, boxing rings and some stars so I painted them on the some cardboard which was stuck on some double sided sticky tape, then I printed them on to a piece of fabric for my flag.

I do enjoy the drop days as they are very “cool” and we get to work with people we don’t normally work with. We are going to France; Hastings and Brighton to show our carnival work with everybody! 😊
